- Assistance undersecretary of primary healthcare and public health represent the Chairperson.

**Kingdom of Bahrain
Ministry of Health
Immunization Committee**

- The core members mostly represent multidisciplinary expertise neither directly/ indirectly supervise, nor report to the immunization program.
- All members completed a declaration of interest and all members signed a confidentiality agreement.

Rotation:

- The rotation among some of Ministry of Health experts included as core members according to change of positions and their years of presence.

Termination:

Reasons for termination include:

- Change in positions for some members from Ministry of Health;
- Conflict of interests
- Breaching confidentiality.

Modes of Functioning

Formal recognition and general support:

- The Immunization committee formulated through a ministerial decree. The decree state position of some of immunization committee that is MOH employee appointed the chairperson and specifies that Immunization programme manager serves as the secretariat.
- Immunization programme manager is considered a non core member who provides background information and contribute to the discussion but not involved in the final set of recommendations.
- The term of reference are clarified in the decree.
- NITAG members serve as volunteers
- High level support is provided by authorities at ministry of health to facilitate meetings

Agenda preparation and frequency of meetings:

- The EPI manager serves as the executive secretariat. Immunization committee meets at least once every three months; however frequency may be adjusted as necessary.
- Ad hoc meetings might be arranged to cover urgent agenda topics such as H1N1 vaccine.
- The agenda first developed and send to the all members through email prepared and circulated prior to meetings along with the time of the meeting.
- Secretariat and members can agree on some agenda topics that are planned for next one to two years such as HPV vaccine introduction.
- Agenda and background materials might be prepared with the support of scientific institutes or organizations.

Reporting, recording and dissemination

- The secretariat records the meeting minutes.
- The meeting minutes circulated to all members for feedback and approval within two weeks of the meeting.
- The NITAG, and specifically the Chair, report to H.E. Minister of Health the conclusions and recommendations that is endorsed by immunization committee members.
- Feedback circular to healthcare workers in governmental and private health facilities or to media to communicate the recommendation drawn from meetings is done on demands.

Decision making and recommendations

- Meetings are closed and by invitation only.
- All members are aware of the term of reference and mode of the committee function.
- All members provided with scientific materials related to topics of discussion with a summary or comparison table if required. This is done to facilitate taking decision.
- The discussion and decisions are based on best available evidence and public health priorities. These might includes updates on immunization schedules, disease burden, cost effectiveness, decisions on new vaccines introduction such as Pneumococcal conjugate vaccine or suspension of any vaccine, and recommendations on urgent issues such as H1N1 vaccine.
- Decisions and recommendations are made through consensus. If consensus is not reached on a particular recommendation, the Chair make a decision on the final recommendation noting in the minutes that there was no consensus reached on the issue at hand.
- The recommendations are sent by chair person of committee to H.E. Minister of Health seeking his agreement on implementation.
- Some experts (not from committee) might be invited sometime to attend the meeting in order to take their experience and contribute scientifically to some of the meetings.
- Sometimes vaccines and pharmaceutical representatives invited to present data regarding their studies and products.

Working Group/ task force:

- Task force groups some times establish and operate under specific terms of reference such as review and provide evidence based information and recommendations about specific topics within a time limit. Accordingly a summary report to be submitted to the NITAG.

**Kingdom of Bahrain
Ministry of Health
Immunization Committee**

- Task force groups are chaired by NITAG member.

Performance

- High performance level is considered through strong commitments by the members and the presence of multidisciplinary experts that work scientifically and communicate with transparency.
- Moreover, high level of political commitment by authorities at Ministry of Health that consider the recommendation of NITAG in any technical decision related to immunization services in the kingdom of Bahrain.
- The indicator used to determine NITAG performance is percent of NITAG recommendations generated from the meetings conducted in the last year which are being implemented by the Ministry of Health.
